

Patrick Guo

Executive Vice President, Tenneco
President, Clean Air

Patrick Guo is executive vice president, Tenneco and president, Clean Air. As the leader of Tenneco's Clean Air product line globally, he is responsible for continuing Tenneco's regulatory-driven growth with light vehicle, commercial truck and off-highway customers across all regions.

Prior to his current role, Guo served as Tenneco's executive vice president, Asia Pacific, where he successfully led growth throughout the region for both the Clean Air and Ride Performance product lines.

Previously, Guo served as vice president and managing director, China, and played a key role in Tenneco's expansion in this important high-growth market. He originally joined Tenneco in 1996 and has held various leadership positions during his tenure with broad experience in serving both original equipment and aftermarket customers. He began his career as an engineer with the Ford Motor Company.

Guo holds a bachelor's degree from Tsinghua University, Beijing and a master's degree from The Ohio State University – both in mechanical engineering. He also earned an MBA from the University of Michigan.
